

Battersea Park Reflection Issues

The new building works on the site surrounding Battersea Power Station have raised some concerns similar to those with the Building of the Shard. This has been raised by the Victoria Southern H&S Rep with the GTR (Southern & GX) Safety Team. The response and advice from the Safety Team is as follows.

- Call the signaller and advise that you have experienced a glare issue and the relevant signal number.
- Before booking off the driver must complete the relevant reporting form RT3185 and submit this to their Resource Manager who should forward this to report to Control.

Calling the Signaller and submitting a written report, helps build a case and provides evidence that there is an issue. Please ensure you give a copy of your written report to your H&S Rep

Your H&S Rep has received a request that reports are forwarded to Graham Hoy, H&S Rep at Victoria Southern Depot.
